Introduction to Data Publishing in Zenodo

Jeremy Azzopardi, Research Engineer, Chalmers e-Commons
Therese Tikkanen, Bibliometrician, Chalmers e-Commons
2026-feb-10

By open data in science we mean that it is **freely available on the public internet permitting any user to download, copy, analyse, re-process, pass them to software or use them for any other purpose** without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.

(Panton Principles, retrieved 2023-09-25 from <https://pantonprinciples.okfn.org/index.html>)

Old Data Saved:

- 1884–1931 plant surveys.
- Rescued from disposal.

Data Reused:

- Re-surveyed 277 sites using same 30×30 cm plots
- Found 26% species loss (40% lowlands, 11% Alps)

Impact:

- Rare pre-industrial biodiversity baseline
- Land use, not climate, drove most losses

Why not just OneDrive? Or e-mail?

- FAIR requires infrastructure!
 - Metadata standards
 - Licence info
 - Documentation
 - Tombstone
 - PID/DOI (citeability)
- But also:
 - Search functionality
 - Metadata propagation
 - Access control (open/restricted/embargo)
 - Version control
 - Preservation policy
 - Costs & responsibility moved away from single person

DOI [10.5281/zenodo.6221220](https://doi.org/10.5281/zenodo.6221220)

Publishing FAIR research data

Publishing data != article
or data paper.

Two parts: publicly
available metadata
(information about data) +
data & documentation
(open or restricted access)

”As open as possible, as
restricted as necessary”

Ageing in Women and Men: A Longitudinal Study of Gender Differences in Health Behaviour and Health among Elderly (GENDER)

SND-ID: 2022-46

This study is part of the collection [NEAR - National E-Infrastructure for Aging Research in Sweden](#)

Description

Data and documentation

Creator/Principal investigator(s)

[Deborah Finkel](#) - Jönköping University, College of Health and Welfare 

Description

The Longitudinal Study of Gender Differences in Health Behaviour and Health among Elderly (GENDER) is a study of unlike-sex twin pairs born between 1906 and 1925 (Gold et al., 2002). A survey concerning health and health behaviors was mailed in 1994 with responses from 1210 twins from 605 pairs where both responded. Mean age at baseline assessment was 74.43 years (SD 4.28) and all were Caucasians.

The main interest of the study was gender differences in health and health behaviors in old age.

• Questions about subjective health, use of healthcare, and behaviors and attitudes related to health, perceived ADL capacity, personality and social networks, formal and informal care etc. are available.

Accessibility level

Access to data through an external actor
Access to data is restricted

FAIR?

In short:

- 1) Have good documentation + provenance
- 2) Keep data well-structured using well-known/documented formats, vocabularies, and standards
- 3) Describe and if possible share data using a trusted data repository

As open as possible, as closed/restricted as necessary

EU's H2020 Program Guidelines on FAIR Data

“restricted” to safeguard the privacy of the subjects, rights, temporary embargo, etc.

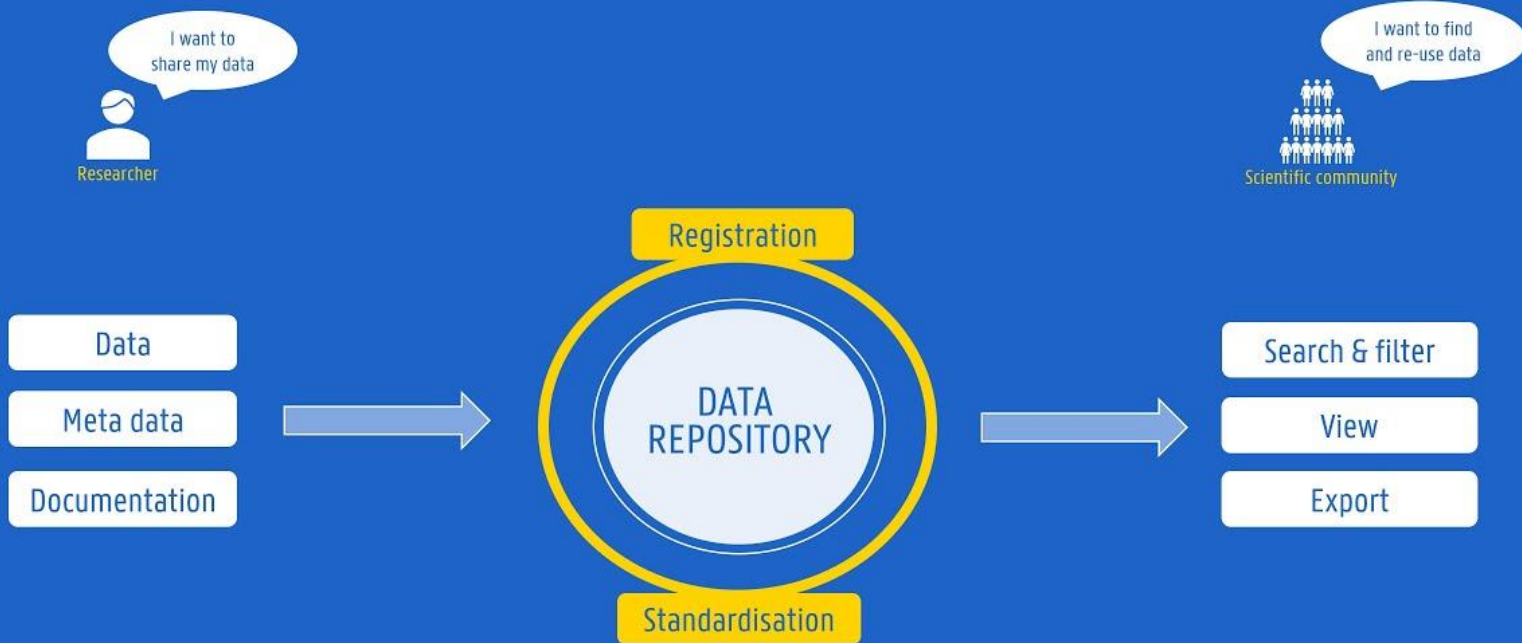

But remember:

FAIR $\neq$ Open

FAIR $\neq$ Binary

WHAT IS A DATA REPOSITORY?

A database infrastructure that collects, manages and stores data for preservation and sharing

Polarization maintaining fiber beam delivery for direct laser interference patterning

Froemel, Paul ; Baumann, Robert ; Lasagni, Andres Fabian ; and 1 other

This paper introduces a pioneering method of delivering high-power picosecond laser pulses through microstructured optical fibe applications. Demonstrating its potential, the team successfully created interference patterns on stainless steel, paving the way f

Basic information

Digital Object Identifier*

Do you already have a DOI for this upload? ☒ Yes, I already have one

☐ No, I need one

Copy/paste your existing DOI here...

A DOI allows your upload to be easily and unambiguously cited. Example: 10.1234/foo.bar

Documentation

Why should I trust Zenodo?

- Clear funding linked to Cern (20 years in the future)
- Clear preservation policy
- Follows existing standards and recommendations for metadata, data, etc.
- Clear access and reuse conditions
- Provides DOI:

DOI 10.5281/zenodo.6221220

Why use Zenodo?

- **Safe** — Your research is stored safely for the future in CERN's Data Centre for as long as CERN exists
- **Trusted** — Built and operated by CERN and OpenAIRE to ensure that everyone can join in Open Science
- **Citeable** — Every upload is assigned a Digital Object Identifier (DOI), to make them citable and trackable
- **No waiting time** — Uploads are made available online as soon as you hit publish, and your DOI is registered within seconds
- **Open or closed** — Share e.g. anonymized clinical trial data with only medical professionals via our restricted access mode
- **Versioning** — Easily update your dataset with our versioning feature
- **GitHub integration** — Easily preserve your GitHub repository in Zenodo
- **Usage statistics** — All uploads display standards compliant usage statistics

Publishing Data

- Which data to publish?
- Where to publish?
- Preparing data for publication.

Which data to publish?

- Reuse potential
- Link to publication
- External requirements
- Raw/intermediate/processed?
- Own data or reused? Permission?
- GDPR/other restrictions – can still be described!

**CHALMERS**
UNIVERSITY OF TECHNOLOGY

Chalmers University of Technology

This is a community for researcher's at Chalmers University of Technology who wants to deposit research data via Zenodo, get the data curated by the research data office and obtain a DOI for

Other outputs

Digital: software, workflows, protocols, models, etc.

Physical: new materials, antibodies, reagents, samples, etc.

- How will they be managed?
- How will they be made FAIR?

Where (else) to publish data?

- Use a disciplinary repository if there is one
- Use a general repository like Zenodo
- Search in registries such as re3data.org or FAIRsharing.org

Thank you!
